This paper summarizes on the study of the perspectives of the visitors towards museums especially children between the age group of 8-16 years of age. The main objectives of the study were to study the contribution of museums in generating interest in young children, the user's perspectives towards the museums and make museums user friendly for children. The sample size of the study was (n=50) and the tools used for the study was questionnaire and focus group interviews with the parents of the children visited the museums. The results of the study showed that the children showed interests and enjoyed their visits but, their perspectives and expectations of the museums have changes over the years. They want a user friendly museum where the learning gets more interactive not only with the help of technology but through traditional ways of learning.
